

WALT: subtract from one part of a number

Spin 1

Find the difference.

$7,837 - 7,000 =$ <input type="text"/>	$4,592 - 4,000 =$ <input type="text"/>	$9,458 - 9,000 =$ <input type="text"/>
$7,837 - 800 =$ <input type="text"/>	$4,592 - 500 =$ <input type="text"/>	$9,458 - 400 =$ <input type="text"/>
$7,837 - 30 =$ <input type="text"/>	$4,592 - 90 =$ <input type="text"/>	$9,458 - 50 =$ <input type="text"/>
$7,837 - 7 =$ <input type="text"/>	$4,592 - 2 =$ <input type="text"/>	$9,458 - 8 =$ <input type="text"/>

Spin 2

Complete the table.

	Subtract 10	Subtract 100	Subtract 1,000
2,576			1,576
7,929	7,919		
		6,070	

Spin 3

Rank the calculations from easiest to hardest.

Explain why.

$6,493 - 6,000 =$

$6,493 - 400 =$

$6,493 - 90 =$

$6,493 - 3 =$

Easiest

Hardest

I think is the easiest calculation to solve because.....
